### Overview

#### Description:

The CS-HTM-KHM-3200S is Roll-to-roll Heat Transfer Machine that is design to transfer images, with the dye sublimations ink system; a variety of substrates can be print with this machine, including polyester textiles.

Increase on the peripheral temperature is a fast process so the heat is even in the entire unit.

Low noise and stable speed.

A convenient operation failure power function is included in the machine.

High efficiency and energy saving up to 40% less than ordinary oil based power.

#### Characteristics:

Unlike digital direct prints, the heat transfer images never faded and discolored in harsh environment

like sun exposure, they can last long time on stores with any damage on the print image. The products that are printed with the CS-HTM-KHM-3200S electric heater are reliable, safe and easy to maintain.

#### Application:

The CS-HTM-KHM-3200S is specially designed for custom made clothes, fabrics, wall coverings murals, signs, banners, flags, POP show display, fine art, etc.

### Details

Power	3600W
Working Size	3100mm

## Specifications

---

**Specifications:**

Voltage(V): 380V 3P

Power (KW): 36

Temperature (?): 0-399

Speed: 0-3m/min

Heat Drum Size: 500?/Dia. x 3200mm/L

Available working width (cm): 310 Difference Average Temperature on full length of drum: +/- less than 2

Net weight of the cloth conveyor: 300Kg

Gross weight of the cloth conveyor : 450Kg

Net size of the cloth conveyor : 900 x 570 x 3700mm

Gross size of the cloth conveyor : 3830 x 710 x 1150mm

Net weight of the cloth roller: 450Kg

Gross weight of cloth roller: 600Kg

Net size of cloth roller: 900 x 620 x 3700mm

Gross size of cloth roller: 3850 x 770 x 1180mm
