Overview

3.2m Epson DX7 printer has the best combination, super-wide and high precision. It does not only meet the demands of regular advertising printing, but also can accept special orders of super-wide size to get better profit. 3.2m Epson DX7 printer also suitable for the mature company to increase productivity and bring up new business opportunities.

Features

1. DX-7 Micro Piezo print Technology
DX-7 print head with micro piezo print technology can show not only the excellent printing quality, but also the durability to the Eco-solvent inks. DX-7 print head has a longer and more durable working life. The improvement of printing precision makes the ink droplets smaller, and the stability is better than that of DX-5 print head.

2. 3.2m Super-Wide Print Width
Not only can meet the demands of regular printing, but also accepts the special order of super-wide size and expand the business range. Super-wide inkjet printer can use in the textile and other special fields, and the precision is much better than that of the common solvent printers.

3. Dual Print Head Design
The technology of two print heads is the mature technology that we bring out to the market in the early stage for years.

4. Comprehensive Media Handling
The standard media handling includes the automatic feeding&take up system that can load up as heavy as 200kgs. The heating system and hot air drying system which can now easily print on flex banner and diversity media.
