## QA

Q

I notice this model is slightly different than the image of FMJ-1600. This model is FMJ-1300-C. What is the C?

A

it has The same operation step asFMJ-FM.But we developped its function. 1,FMJ-FM-C can heat to 100 centidegree,so it can laminate PE protective film,becasue the glutinosity of PE protective film will be much better.(the PE protective film normally used to laminate the boards)
