Верхняя часть изготовлена из антикоррозийных материалов, прочных и долговечных, не уступающих по своему качеству оригинальным.

Спонж изготовлен из материала, обладающего высокими впитывающими свойствами.

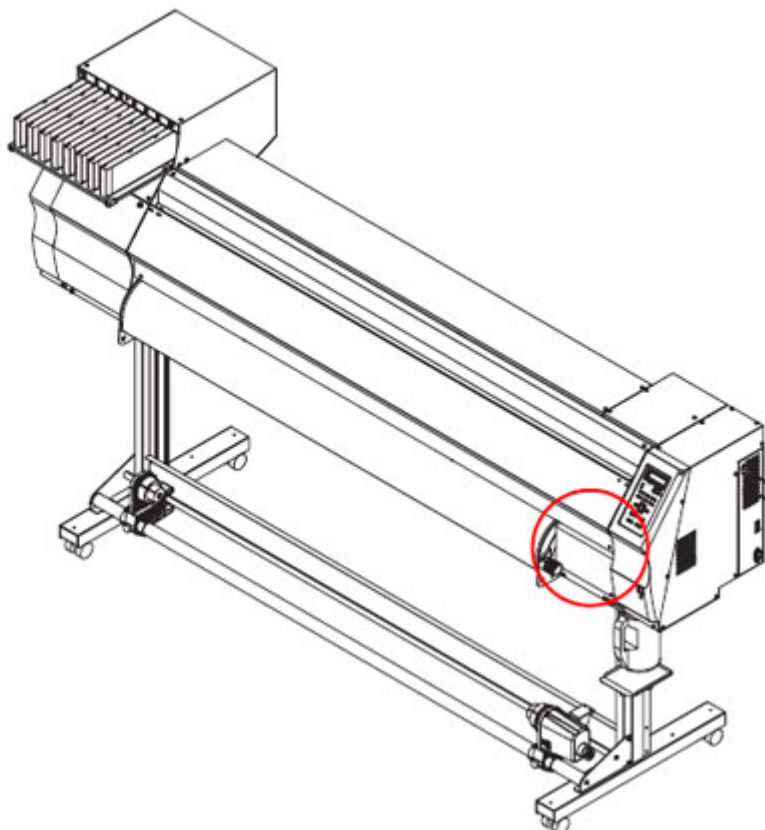

Резиновые части обеспечивают плотное соединения с печатной головой и гарантируют эффективную и качественную чистку.

??????????????:

3-3-3. Capping Assembly

- 1 Turn the main power supply of the printer off.

Be sure to shut the main circuit breaker on the back to prevent unexpected movements.

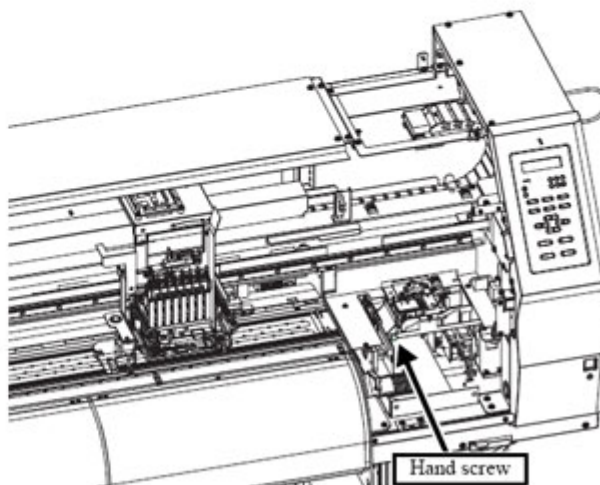

- 2 Manually move the head unit over the platen.

- 3 Remove the wiring cover (x6 screws).
(See [P.3-5](#))

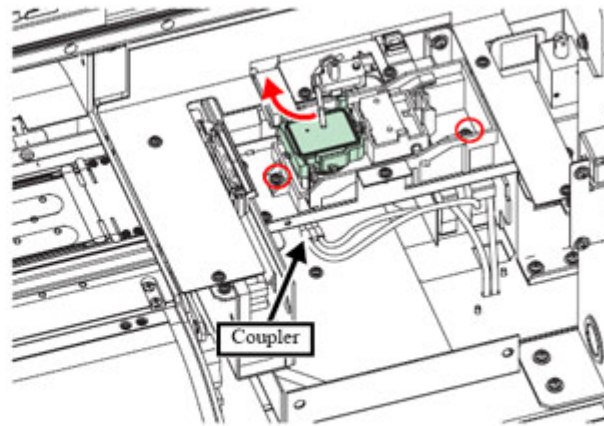

- 4 Remove the station cover (x5 screws).
(See [P.3-4](#))

- 5 Remove the head cover (x2 screws).
(See [P.3-4](#))

- 6 Remove the hand screw (x1) and component.

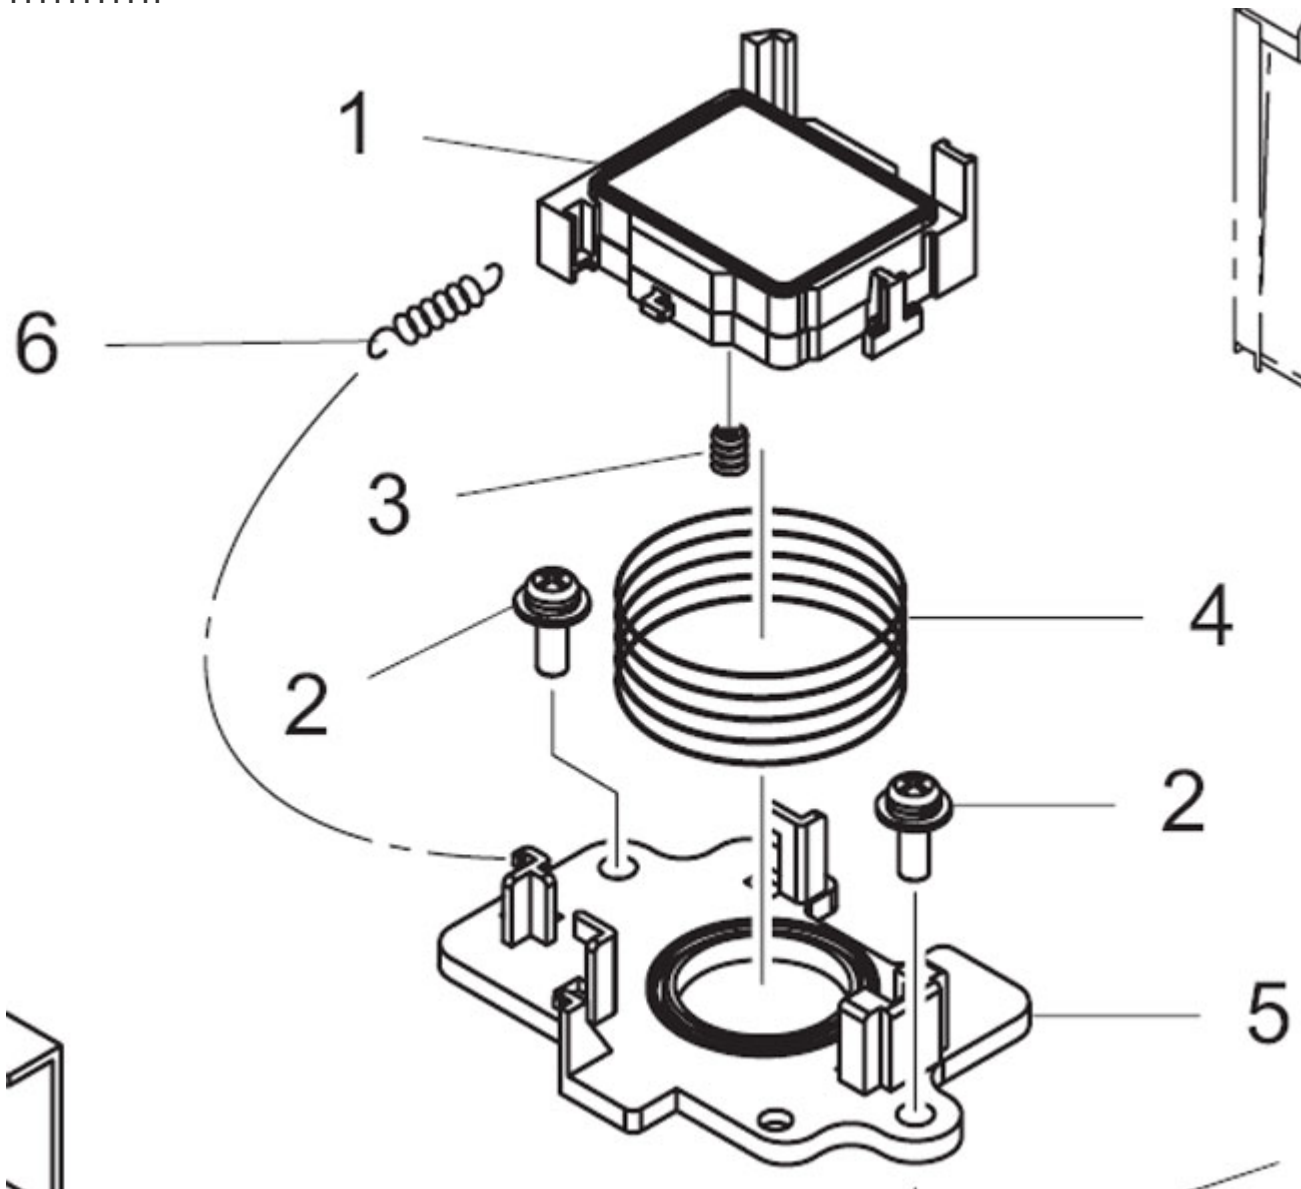

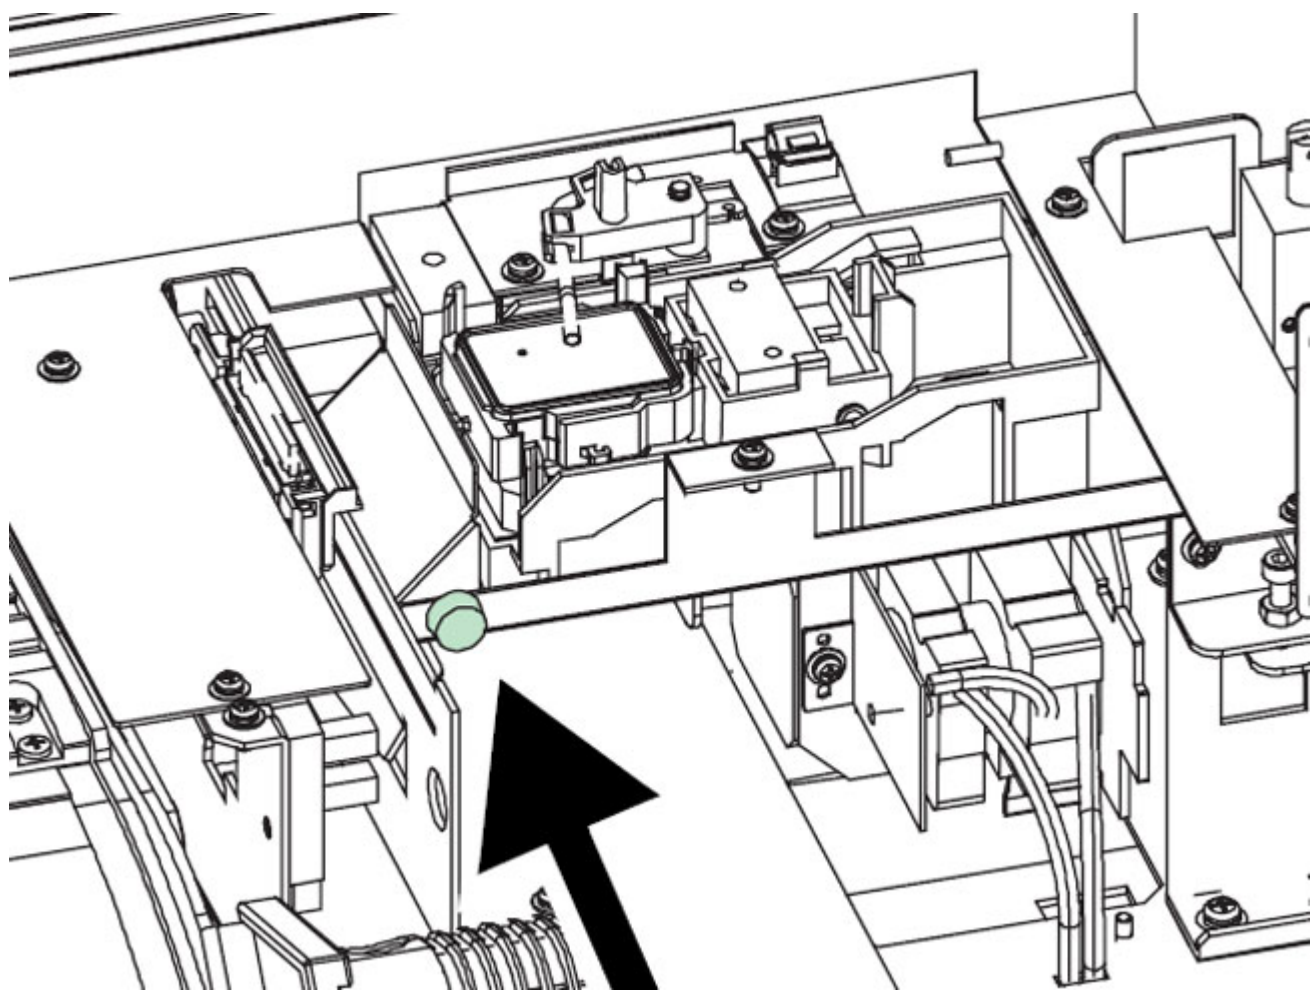

- 7 Remove the coupler between the capping assembly and tube.
- 8 Remove the screws (x2).
- 9 Remove the capping assembly while turning back the pump washing parts.

- 10 When reattaching, insert the capping assembly into the prescribed position while turning back the pump washing parts at capping upper part.
