Overview

Product Description:

The EFR-N150 CO2 laser cutter is a compact, desktop-sized machine designed for precision cutting and engraving. It features a powerful 150W laser tube and a high-speed spindle motor. The machine is equipped with a safety interlock system and a dust extraction port. It is suitable for cutting and engraving various materials, including wood, acrylic, and metal. The machine has a sturdy metal frame and a large work area. It is easy to operate and maintain. The machine is available in two versions: F4 and CL1600. The F4 version has a maximum cutting speed of 10mm/min, while the CL1600 version has a maximum cutting speed of 300mm/min. The machine is also available in two colors: silver and black. The machine is a great choice for anyone looking for a reliable and efficient laser cutter.
