### Overview

#### Features:

- Using the PWM dimming technology, by remote control dimming, Color temperature adjustment, freedom packet synchronization control.
- Using 2.4G high frequency wireless remote control, with low power consumption, transmission distance, strong anti-interference ability worry, air communication rate and so on.
- Energy saving: more than 70% energy than incandescent, no ultraviolet light, infrared light and other radiation, no lead, mercury and other harmful substances.
- The product no flash, anti-stamping, seismic capability, safety lighting requirements for public places.
- Reasonable learning design, low light decay Samsung LED light source, light color uniform, no aperture, no dark areas.
- Using modern aesthetic streamlined design, compact structure, beautiful appearance, high quality aluminum alloy sheet composition cooling fins to maximize heat dissipation area increases, the weight of the lightest reduced.
- The product supply with wide voltage, high photoelectric conversion efficiency, universal.
