3. Press the photo cutter.

4. Get the photo you have cut and move the cutter away.

5. Finished photo.

6. The photo after cutting.

## Comparison

**VS**

Item	Photo Cutter	Cutter Knife
Application	Specially for cutting photo paper.	It can cut paper, photo, KT board, etc.
Convenient	It's convenient to cut without other tools.	It need to use together with ruler.
Efficient	It's high efficient to use the photo cutter. You just press the handle that you can get the photo you want.	It's slower because it need the ruler to cut or it ca not cut with straight line.
Cutting Effect	There are no rough edges on the cut photos.	It's easy to make rough edges.

**Warm Tips:**

- This photo cutter is suitable for cutting the photo paper with the thickness between 150g-200g. It will get not very good effect when the thickness is out of the range of 150g-200g and the photo is laminated film.

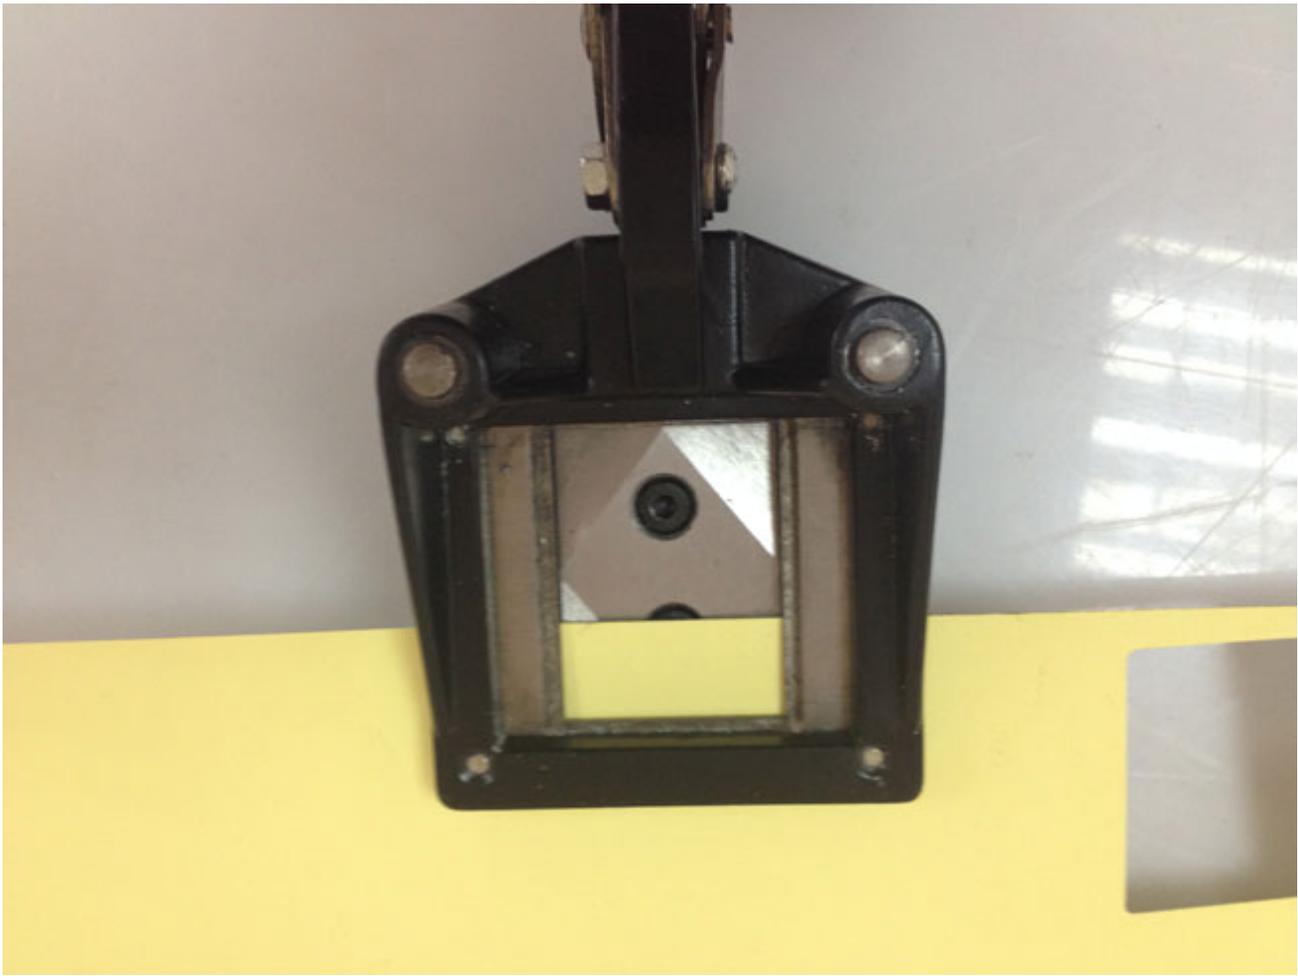

## Application

The photo cutter is used for cutting photos, such as ID card photo, photo for driver s license, photo for passport, etc.
