Overview

Machine size: 29cm x 15cm x 24cm(L x W x H)

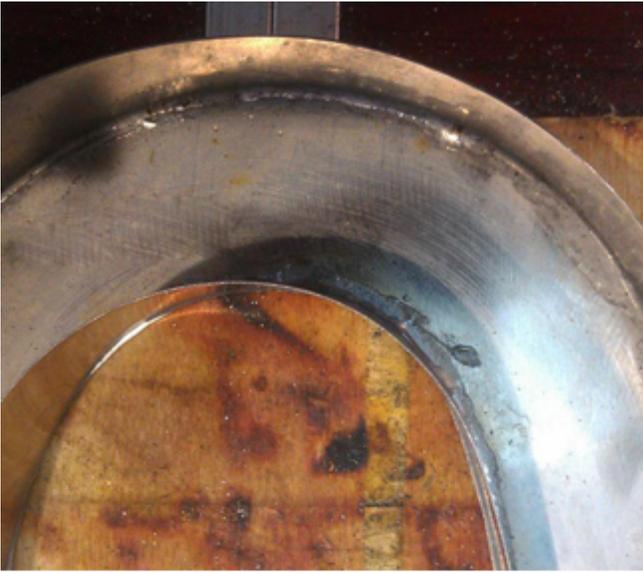

Power: 220V/300W

Features:

- Eddy-current heating, large power, microcomputer temperature control, auto-feeding tin, welding secure, homo-thermal operation which doesn't damage the protection film.
- Adjustable temperature, quick speed of welding, smooth welding seam.
- Auto hibernation after 20 minutes without operation.
- Along with newly developed environmental welding agent, 3-5 times of work efficiency than traditional welding process.
- Simple operation, that is easy for ordinary workers to master.
- The gun body using long-life design, Low power consumption, non pollution, environmental protection and durability.

Application:

Weldable for stainless steel, titanium plate, iron sheet, copper, galvanized sheet, etc. which is widely used in advertising metal letters welding work.
