### Overview

#### Silica Gel Pinch Roller Wheel for PCUT Vinyl Plotter Cutter, Original

**Hole diameter:** 4mm

**Outside diameter:** 17mm

**Width:** 10mm

**To be used with:** CT630/CT900/CT1200/CT630H/CT900H/CT1200H

#### Pinch Roller maintenance:

- Pinch Roller should be cleaned frequently, because rollers are easy to make sticker adhesive on. Pinch roller are generally rubber products, so usually damp cloth is needed for cleaning. If there are so much sticker, cotton dipped in alcohol can make it clean.
- Pressure on the pinch roller cannot be adjusted without pressure gauge in order to avoid that uneven pressure leads to paper deviation .
- It is time to replace rollers when the paper deviates more and more seriously and cleaning can not help any more. All rollers should be changed at the same time in case that different friction factors of old and new pinch rollers make paper deviate.
