Overview

Product advantage:
1 Super bright LED and plastic quality.
2 High contrast can achieve good results.
3 Weight is easy to install and remove.
4 Single point, single light maintenance, low cost.
5 Constant current mode is used to drive LED, even light, low power consumption.
6 Beads glue dispersing agent (DP), surface spray. The point light source into surface light source, to ensure consistency of better visual effect, more plump, soft.
7.100% new material support rubber shell (PPA), seal.

Specialty:
We don't have a spec or datasheet at this time. However, these are the specifications from the factory.

Dimensions: 192mm x 96mm x 12mm (7.6" x 3.8" x 0.5")
Panel weight with IDC cable and power cable: 170g
5V regulated power input, 2.5A max (all LEDs on)
5V data logic level input
2000 mcd LEDs on 6mm pitch
1/8 scan rate
Indoor display, 120 degree visibility
Displays are 'chainable' - connect one output to the next input - but our Arduino example code does not support this yet.
