Overview

Autonics Small & Light Common Photoelectric Sensors for DGI (BM1M-MDT)

Description:

BM Series is easy to mount at a narrow space due to its small size and light weight. Screw type mounting hole is another feature of this series that allows more convenient mounting. Various detection types including diffuse reflective type, through beam type and retroreflective type allow more diverse user application area. It is used for DGI series printer, such as DGI SPACEJET-3250P.

Main Features:

Easy to mount at a narrow space with small size and light weight.

Convenient to adjust the sensitivity by external sensitivity adjustment control.(Diffuse reflective type only)

Easy to mount by screw type in mounting hole.

Reverse power polarity protection circuit.
