## QA

|   |                                             |                                        |
|---|---------------------------------------------|----------------------------------------|
| Q | Can this cutter use the software flexi 8.5? |                                        |
| A | Yes, it supports the software flexi 8.5     | Reply by <a href="#">sign-in-china</a> |
| Q | Can this cutter both print and cut?         |                                        |
| A | This cutter can only cut.                   | Reply by <a href="#">sign-in-china</a> |

|   |                                                                                                                                                                                                                                                  |
|---|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Q | I would like to know what is contour cut?                                                                                                                                                                                                        |
| A | <p>Contour cut means that you use the printer to print on decal paper or whatever, then the cutter cuts out around the graphic to make a sticker of what you printed.</p> <p>Reply by <a href="#">sign-in-china</a></p>                          |
| Q | Does this cutter support Adobe Illustrator for design?                                                                                                                                                                                           |
| A | <p>It supports Adobe Illustrator. You can use the Adobe Illustrator to design the image and save the image as PLT format, then you can output the image through Artcut and cut the image out!</p> <p>Reply by <a href="#">sign-in-china</a></p>  |
| Q | Do your machines use commonly available cutting knives, and if so what type. How much does the Corel Draw plug in cost. Denis                                                                                                                    |
| A | <p>We have the cutting blades, Roland blade (30 degree, 45 degree, and 60 degree): \$3 / pc (AA grade blade) \$5 / pc (3A grade blade). The cost for Corel Draw driver is \$25 USD/pc, thanks.</p> <p>Reply by <a href="#">sign-in-china</a></p> |
