Overview

Usage Tips:

It is important that you choose a tip size when ordering your engraving tools. The tip size will determine how wide your line is. For small character engraving choose a smaller tip size. For example when engraving 1/8" tall letters use a .010 or .015 tip, but for 1/4" tall letters use a .020 or .030 tip.

The taller the letters or characters is, the larger the tip size of the cutter should be. For example; for 1/4" tall letters you should use a .020 or .030 tip but for 1/8" tall letters a .010 or .015 tip would be better.

Remark: Please Choose the Model when ordering.
