Overview

Main Function: Scan/engrave/cut

Application:

This laser engraving and [cutting machine](#) is equipped with a standard knife shape aluminum rib working table and a standby honeycomb working table, so it can be used in more industries, such as music instrument, art gift, advertising decoration, toy, electronic industry, cutting of template, paper product, costume products and so on.

Materials that can be engraved:

They can engrave on all kinds of nonmetal materials and parts of coated metals, such as bamboo, putamina of coconut, paper, plexiglass, acrylic, marble, jade, crystal. It also features a cutting function. With the rotating unit, it can engrave on a cylinder objects, such as cup, pencil vase and so on. It breaks through the limitation of the planar engraving and augments the range of the working.

Product Highlights:

- . Luxurious outlook design, unique door for the limitless engraved materials through. It can engrave on nonmetal materials with high speed and high precision.
- . Professional DSP controlling system, compatible with AutoCAD, CorelDraw, Photoshop, and other kinds of graph disposal software.
- . Adopt step subdivision driver, numeral timing, simulation quantum control laser power, little error, high repeat precision engrave 3mm little character perfectly.
- . This laser engraving and cutting machine is equipped with manual up-down lift working platform for your option, its max. Lifting height can reach to 300mm (11.8"), which greatly broaden the scope of processing objects.
- . Professional laser electrical power and laser tube with high quality makes the laser engravings run stably.
- . LED control panel makes the laser engraving and cutting machine easy operation.
- . Importing high precision beeline slide-ways, importing professional optical system, improve the engraving quality.
