QA

Q	What's the tool adjuster?
A	The tool adjusters are one of the necessary accessories for machining centers and CNC machines as well as a measuring instrument for compensating for the length of tools. Reply by sign-in-china
Q	What hardware does the machine need?
A	Hardware includes the machine, computer, controller, water pump, etc. Reply by sign-in-china
Q	What software does the machine use?

A	Type 3 or Ucamcam V8. Reply by sign-in-china
Q	Do I need to install the machine after I get it?
A	Yes, there are some simple connections you need to do, the manual is with the machine for your reference. Reply by sign-in-china
Q	Is there any warranty for the cutting blades?
A	Sorry, there is no warranty for consumable parts such as cutting blades. Reply by sign-in-china
Q	Do you offer cutting blades?
A	Yes, we do. Reply by sign-in-china
Q	What other products related to CNC engraver do you supply?
A	We can also offer acrylic board, PVC foam board, ABS board, PC board, acrylic vacuum machine, acrylic bending machine, acrylic polishing machine and cutting blades. Reply by sign-in-china
Q	Could you provide details as to what software works best with this machine?
A	Thank you for your inquiry on our Woodworking CNC Router with Vacuum Table (CNCR-JR-1325V). About the best suitable software: It could work with various of CAD/CAM software. For engraving software, it could work with Artcut, Type3 or Artcam. If for simple emboss, Artcut or Type3, either is suitable. If for very complex emboss, then Artcam is needed.
