Overview

Features:

- Very thick PU plotter cut material.
- It's easy cutting, weeding and applying.
- The thickness is 600 microns to 1000 microns.
- Brick is CPSIA Certified.

Description:

Not everyone is looking for the thinnest materials available. Sometimes a design calls for a thicker material. Well, we have it for you. It's 600 Microns to 1000 microns of it! It's called Brick™ and it's a thick, flexible material designed for smaller logos and designs and adds an extra dimension to your garments. When you feel your design is just too flat, please consider changing brick vinyl for another different amazing effect.

Brick is CPSIA Certified, so it's perfect for decorating children's clothing and accessories.
