Overview

Features:

- PU cut material.
- Pressure sensitive backing.
- New Siser P.S. product with sublimation block..
- P.S. Subli LT film is CPSIA Certified.

Description:

When decorating sublimated jerseys, you're limited to what material you can apply. Standard heat transfer vinyl will change color as the color in the garment migrates through the design. EasyWeed Sub Block is specially formulated to block all dye migration and leave you with an awesome looking jersey! Looks great on the digital camo and motocross jerseys that are so popular right now!

EasyWeed Sub Block is OKO-Tex Standard 100 Class I Certified, so it's perfect for decorating children's clothing and accessories.

Specification:

Width: 20" (50cm)
