### Overview

?????????:

?????? ?????????? ??????? ?????? ??????????? ?????????????? ?????????????????? (????? ?????????? - 327°C). ?????? ?????????? ?????????? ????????????. ?????????? ? ?????????????? ?????? ? ??????????, ?????????? ?????????????????????? ???????????.

?????????????????:

?????: ????????????

?????: 5mm,10mm,13mm,15mm,20mm,25mm,38mm,50mm

?????: 10?

?????: 0,13??

????????? ??????????????????????: -100°C - 270°C

### Features:

Comparing with common tape, this product is more heat and cold resistant. In continuous working, the temperature range is from 100°C to 270°C, its melting point reaches 327°C, low friction and good lubrication; it also has good effect in insulation for high voltage; there is no chemical reaction for chemical medicines or agents, and solvents; it possesses resistance for light, oxygen, etc.; nice in paste ability; wear-resisting, anti corrosion, micro resistant, thermostable, unordinary smoothness; and it pastes solid and no adhesive failure as well as symmetric texture and other advantages, etc.

### Specifications:

Color: Brown  
Width: 5mm,10mm,13mm,15mm,20mm,25mm,38mm,50mm  
Length: 10m  
Thickness: 0.13mm  
Temperature Resistance: -100°C to 270°C

**Usage:**

- Insulation for electrical wire, cables and cords (for H class of electrical insulation)
- The lining materials of loading hoppers
- Sliding material of lead rail
- Insulative material of heat sealings
- Anti-adhesive of glue or sticky material
- Demolding of wood and plastic molds.
- Paper feeding tape of fax machine
- Lead rail of duplicator or copying machine
- Lining materials of washer
- The filler pieces contacting anti-corrosive chemical medicines
- Linings for sliding surface of different mechanics

**Applicable Industries:**

- ?Light and electronics, such as LCD, FPC/PCB, etc.
- ?Packaging of food and medicine.
- ?Heat sealing machine for plastic bag and high speed one as well.
- ?Heat melt glue machine
- ?Motor, high or low voltage electrical products, cable or wire insulative protection, battery production.
- ?Sewing machine and staking machine
- ?Packing of rubber and plastic rollers
- ?Other applications which require heat resistant, wearing-resisting, anti corrosion, and anti-adhesive.

**Package:**
