Overview

Adopting printhead Konica-512 42pl, high resolution which is near photo quality.

Double side printing can print sameness image on both side. For instance, it can print same image on both side of flex banner or print different image on both sides of flag media. With the international invention patent and many years of experience, it's the unique synchro double side large format printer in the world. Other double side large format printer is incomparable with our 100% calibration. 0% waste, easy printing process.

Synchro double side printing Multi- function double printing value:

- 1) image on both side, [light-box](#) making, 100% fresh color keeping.
- 2) Different printing image on both sides, top grade banner making, viscosity process saves, appreciation improving.

3) [Single side printing realizes high speed and resolution making](#) of front-lit media.

International advanced accurate calibration function:

- 1) [Printing media](#) enlaced on two rollers with S shape, media steps with the roller as well as printing simultaneously.
- 2) Single media feed structure and clutch device guarantee data accurate media step.
- 3) FPGA control system which based on raster position guaranteed data transmission of image both sides
- 4) PTC high-effective air-dry system guarantee fast dry of printed media.
- 5) The light and observation window in the front of the machine guarantee back side printing observation during printing.

Our Synchro Double Side Printer produces real, synchrony, printing easily double side, and without special requirement on quality and length of the media; cutting is possible while printing.

Details

Colors	CMYK or CMYKLcLm
Print Speed	23m2/h-46m2/h
Maximum Resolution	Up to 720dpi/1440dpi
Max Media Width	130.0" (3300mm)
Ink type	Solvent Inks
Print head	Konica512 - 42pl

Max print width	126.0" (3200mm)
-----------------	-----------------

Specifications

Model	8PS Printheads	12PS Printheads	16PS Printheads	24PS Printheads
Print Head	Konica512-14pl			
No. of printheads	8PS	12PS	16PS	24PS
Resolution	up to 720dpi / 1400dpi			
Color	CMYK OR CMYKLcLm			
Single-sided Print Speed	23m ² / h	18m ² / h	46m ² / h	36m ² / h
Double-sided Print Speed	22m ² / h	11m ² / h	42m ² / h	20m ² / h
Print Width	126.0" (3200mm)			
Media Width	130.0" (3300mm)			
Technology	Piezoelectric			
Operation Environment	Temperature 20°C-28°C, Humidity: 40%-60%			
Ink	Solvent ink			
Interface	USB 2.0			
RIP	PHOTOPRINT Or Caldera			
Control Station	Windows 2000/XP WorkStation			
Media Types	Paper, advertising banner, PVC, mesh fabrics, vinyl, carpet, etc.			
Image data format	JPG, TIFF, EPS, PDF			
Power	Single Phase, AC 220v, 50Hz/60HZ, 3000w for control power
