# SPT Alpha 1024HG Printhead

- Independent Nozzle Technology**
  - Independent nozzle technology brings high fire frequency.
  - Industrial printhead with long life span.
- Duo or single color per head**
  - 1024 nozzles for each head, nozzle resolution at 360DPI for single color head, and 180DPI for duo color per head .
- High speed printing**
  - 25pl drop size at 30KHZ to achieve 260sqm/hr with 4 printhead at 480x360 dpi.
- Excellent jet straightness and speed**
  - Jetting velocity of 7m/s to land the droplet perfectly on media.
- Built-in heater**
  - 2 independently controllable built-in heater inside each printhead for warm up ink to appropriate temperature before printing.
- EPROM inside**
  - With EPROM built inside each head, voltage, S/N, nozzle position and usage of printhead can be recorded.
- Industrial interface**
  - KEL parallel interface to report improper connections in software.
- Enforced nozzle plate**
  - Double coating used in nozzle plate film to protect nozzles from scratch.
- Complete seal package**
  - Whole printhead is sealed in complete package to prevent stuff like ink or dust entering inside.

Printhead Configuration	Double head	Four head	Six head
Printhead configuration chart
