Remarks: OEM

Product Size: 60mm*60mm*50mm

Net Weight: 75g

Packing Size: 90mm*80mm*70mm

Packing Weight: 80g

Tips: *If a head (or bank of heads connected to a pump) misfires or gets clogged and you rule out a faulty damper, wiper or broken head, you may have a malfunctioning pump. If after several head are cleaned, and the printhead is still the same, check the pump and replace if necessary.*

- **Manufactured by high strength material, whole product of solvent resistant.**

- **Pump hose is made from special materials, which is durable, anti-corrosion, and suitable for any kind of eco-solvent or water-based ink.**

- **Such product works for the original printer perfectly and its durability and lifespan is almost the same as the original.**

4-2-6. Replacement S-pump assy. (Periodical replacement)

CAUTION

- Be sure to wear protection glasses since you may get ink in your eyes.

If the ink sticks to your hand, the skin may be damaged.

[Parts to be used]

- S-pump assy (M004868)
- Insulock (L60-100 mm) x 2

[Adjusting procedure]

- 1) Remove instrumentation cover C at the back of the main unit.
- 2) Remove two tube clamps in the instrumentation case and then cut two insulocks for securing the tube.
- 3) Remove the station cover.
- 4) Remove the suction side connection joint for the S-pump assy and S cap assy tube.
- 5) Take out the waste liquid side tube of the S-pump assy from the instrumentation case.
- 6) Remove the screw mounting S-pump assy and then replace new S-pump assy.
