Machine Detailed Pictures

1. Adjust the protruding length of the knife top as required for specific cutting media.

2. Control panel of this vinyl cutters plotter

3. The LCD shows

4. Original point setting

5. Blade cutter and holder

Some Tips

- ? Before cutting contour:
 - a. You must set the distance of blade base and right side plate more than 4cm.
 - b. Let the knife point in the bottom right corner of the first mark point after input the correct offset.
- ? You only need to adjust the offset once and record it, if you change the computer, write the record offset value to the new computer, it is ok.
- ? For the small size (e.g.: A4 size) cutting, you can choose two mark points, for the big size cutting, you can choose 4 mark points to increase the precision.
- ? Flexi software can adjust the outline and the graphics distance, please view the details in the video.

QA

Q	Can this cutter both print and cut?	
A	This cutter can only cut.	Reply by sign-in-china
Q	I would like to know what is contour cut?	
A	Contour cut means that you use the printer to print on decal paper or whatever,then the cutter cuts out around the graphic to make a sticker of what you printed.	Reply by sign-in-china
Q	Does this cutter support Adobe Illustrator for design?	
A	It supports Adobe Illustrator.You can use the Adobe Illustrator to design the image and save the image as PLT format,then you can output the image through Artcut and cut the image out!	Reply by sign-in-china
