The circuit is designed with module structure, the layout is reasonable and the long distance service can be realized.

#### Feature:

Main functions of the numerical control text display screen:

##### . Set up system parameter:

Book position, temperature of melting glue, temperature of keeping, spine nipping time and pressure etc. Choose working mode(binding/hanging), and running mode(manual/auto).

##### . Set up craft parameter:

According to the real working condition, regulate thickness of the cover, working temperature, the amount of glue and book smoothness at any time, in order to reach the best binding result.

##### . Working state mode:

Showing the operation process real-timely and dynamically, from `starting` the machine to the binding, the steps all may be showed, the operator can control the machine at any time. With binding quantity and job time showing, convenient to count work load and operating cost.

##### . Warning mode:

Auto-alarm when the machine breaks down in running, and show the trouble spot.
