### Overview

#### 48" (1200mm) Bending Acrylic Machine

Bending the materials like acrylic, plastic, PC, PVC and PP. Hot bending process equipment, it can be adjust any angle and shape within 30-180 degree.

- Automatic and manual function with CNC operations
- Automatic function to bend the sheet
- Softening crevice can be adjusted according to the thickness of plate
- The heating plate can be fixed avoiding defamation
- The Acrylic Bending Machine has an infrared heating system to prolong the lifespan for more time rather than the hot furnace filament.
- The temperature and working voltage can be adjusted according to the material and thickness.
- Water circulation protects the configuration and the overheating alarm temperature ensures the safety of the machine.
- The current package protects the equipment.
- Bending acrylic support for PVC, PE, PS, ABS, PP and more.
- Thickness range ending: 0.8mm to 6mm (there is no need to cut a slot on the sheet)  
6.00mm to 20mm (there is need to cut a slot on the sheet)

### Details

Working Area

48" / 1200mm (W) x unlimited (L)

Maximum Process Thickness	0.8" (20mm)
Main Applications	Bending the materials like acrylic, plastic, PC, PVC and PP. Hot bending process equipment. It can be

adjust any angle and shape within 30-180 degree.

## Specifications

Specifications	
Model	ABM-SB-1200A
Angle	30°-180°
Bending Thickness	0.8mm ~ 20mm
Working Length	1200mm
Power	6KW (Working power 2KW)
