Overview

- **Great blank canvas for sign shop use**
- **Easy to assemble**
- **Indoor & outdoor use**
- **Double-sided**
- **Springs lessen the impact of wind**
- **Base can be filled with water**

This outdoor poster stand is exactly what every sign shop needs. Because of its durable, long lasting quality, customers are sure to love it. The display stand's sign face is made from corrugated plastic, otherwise known as Coroplast. Coroplast is an extremely versatile, extruded twin-wall plastic sheet. Most oils or solvents won't affect the display stand's surface. For stability, the base can hold approximately 6 gallons of water. The high-elastic springs lessen the impact of the wind; this way, the display boards will be able to withstand winds going up to 30mph without falling down. The plastic base won't rust or dent, so users can feel free to display their banner display stands wherever they need them, because the weather is seldom a problem.

Double-sided for maximum advertising capability, this display stand is sure to draw attention both coming and going. Because of its smaller size, this display board is ideal for lower volume areas. However, its advertising power should not be underestimated. Whether they're for advertising a store opening in a shopping center or displaying dinner specials outside a restaurant, these display boards will draw attention no matter where they go.

With our display stands, your customers will be amazed at the amount of options they have when creating their display signs. Notices can be tacked into the plastic or custom artwork can even be applied.

This display board's surface is even, which is perfect for applying adhesive vinyl. With these banner display signs, the advertising possibilities are endless.

Display boards can be changed within minutes, because they set up very easily. Once the display board is designed, the Coroplast should simply be slid into the metal frame, the frame's top bar attached, the frame slid onto the metal posts, and the display board is complete. These display boards were designed with ease of use and frequent sign changes in mind.

Application:

Any sign shop needs.
