Overview

71" (1800mm) Bending Acrylic Machine

Bending materials like acrylic, plastic, PC, PVC and PP. This hot bending process equipment can adjust any angle and shape within 30 - 180 degree.

- Automatic and manual function with CNC operations
- Automatic function to bend the sheet
- Softening crevice can be adjusted according to the thickness of plate
- The heating plate can be fixed avoiding defamation
- The Acrylic Bending Machine has an infrared heating system to prolong the lifespan for more time rather than the hot furnace filament.
- The temperature and working voltage can be adjusted according to the material and thickness.
- Water circulation protects the configuration and the overheating alarm temperature ensures the safety of the machine.
- The current package protects the equipment.
- Bending acrylic support for PVC, PE, PS, ABS, PP and more.
- Thickness range ending: 0.8mm to 6mm (there is no need to cut a slot on the sheet)
6.00mm to 20mm (there is need to cut a slot on the sheet)

Details

Working Area	71" / 1800mm (W) x unlimited (L)
Maximum Process Thickness	0.8" (20mm)
Main Applications	Bending the materials like acrylic, plastic, PC, PVC and PP. Hot bending process equipment. It can be

adjust any angle and shape within 30-180 degree.

Specifications

Specifications	
Model	ABM-SB-1800A
Angle	30°-180°
Bending Thickness	0.8mm ~ 20mm
Working Length	1800mm
Power	6KW (Working power 2KW)

QA

Q About the heating tube, is it easy to change?

A Yes, the heating tube of this bending acrylic machine is very easy to change.

Reply by [sign-in-china](#)

Q What is the life span of the heating tube?

A Normally, the heating tube working life is about 1-2 years; it depends on the daily working time.

Reply by [sign-in-china](#)

Q How many pcs heating tube of this machine use.

A There is one heating tube.

Reply by [sign-in-china](#)

Q Can this machine bend 20mm Acrylic?

Yes, it can, but you should cut a small slot before bending.

A
