Details

Description:

The finished slim lightbox is comparable with products of the same range in foreign countries. It is based on the optics theory that precision machineries can be made into `network` ditches with different width on the high polymer organic materials. This kind of ultra-thin light box is durable and practical with aluminum frame whose width is 1.2"(30mm) and thickness of whole product is 0.7"(18mm), all characters of which make the whole product high-quality and valuable. Also, the slim lightbox uses LED lighting for power saving. It's widely applicable for advertisements in shopping mall, hotel, restaurant, supermarket, etc.

Highlights:

AD series super slim light box whose frame width is 31.2"(30mm) made of superior aluminum and nice frame structure and thickness is 0.7"(18mm), is commercial and valuable.

Remarks:

The overall printed image needs to be larger than the viewing size, in order to have a perfect fit and a great view of the image. This applies to all A1-A4 models.
