### Overview

**Application:**

The CW-5000BG circulating cooling machine is designed to cool the laser tube of the laser engraver and cutting machine.

**Remarks:**

- . The cooling machine suitable for cutting double laser tubes, which are under the 150W and the temperature can be precisely adjusted.
- . The voltage is AC208~230V, and the frequency is 60Hz.
- . The laser tube has a long lifespan that ensures a better effect on the engrave process.

### Details

Main Application	cooling
------------------	---------

### Specifications

**Specification:**

Model	CW-5000BG
Voltage	AC208~230V

Frequency	60Hz
Current	1.4?2.1A
Cooling Capacity	1832Btu/h
Refrigerants	R-134a
Charge Amount	338g
Max. Pump Lift	10M
Machine Dimension	55x28x43 cm
Machine Weight	31Kg
Package	Fumigation free case package
Package Size	72x44x62 cm
Gross Weight	36kg
