### Overview

**Application:**

The CW-5200BG circulating cooling machine is designed to cool the laser tube of the engraver and cutting machine.

**Remarks:**

- . The cooling machine suitable for cutting double laser tubes, which are under the 150W and the temperature can be precisely adjusted.
- . The voltage is AC208~230V, and the frequency is 60Hz.
- . The laser tube has a long lifespan that ensures a better effect on the engrave process.

### Details

Main Application	cooling
------------------	---------

### Specifications

Model	CW-5200BG
Voltage	AC208~230V

Frequency	60Hz
Current	2.6~3.3A
Cooling Capacity	6295Btu/h
Refrigerants	R-22
Charge Amount	350g
Max. Pump Lift	10M
Machine Weight	31Kg
Machine Dimension	55x28x43 cm
Package	Fumigation free case package
Package Size	72x44x62 cm
Gross Weight	37kg
