### Overview

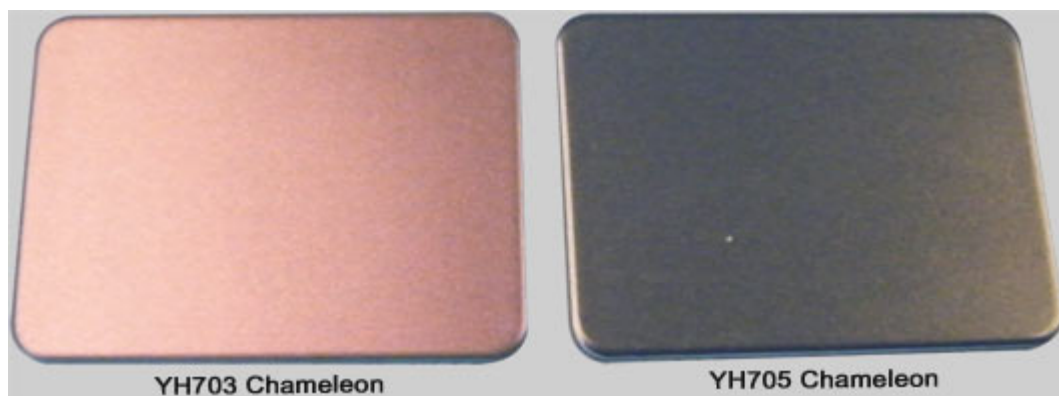

#### Description:

The Chameleon ACP is composed of two aluminum panels (each on one side) and the core made of PE. Chameleon ACP is inspired by themes from `nature` such as iridescent colors. The surface coated with a special high gloss painting, brings us a smooth and colorful feeling. Interaction between light and material, reflection, diffraction and absorption are the secrets of color effects in nature. Chameleon ACP shows fantasy decorative effects.

#### Features:

- .The colour of the surface changes according to different light and visual angles.
- .High glossy, more than 85%.

#### Color Chart:

#### Application:

It is used for signage, advertising, engraving, etc. It is also suitable for special visual decoration, such as ads show, art building, etc.

**Remarks:**

.This kind of double-side Chameleon ACP is coated with PVDF and mainly used outdoors.

.Other sizes, colors as per customer's options can be accepted.
