## Overview

This is our 4th Generation iPhone cover printer. It adds the functions of printing on BlackBerry, Samsung, HTC, Nokia, iPad and leather iPhone and iPad covers. It can print on any kinds of designs on phone shells, leather iPhone and iPad cases. Automatic head clean system. It is easy to operate, no need for special training.

**Features:**
• Print images, photos, words on iPhone shells, iPad, any leather iPhone cases

Printed with RIP, so the color is exactly same as image prepared

VS

Printed without RIP, so there is color aberration

• Print on 4 pcs of mobile covers at one time without any coat.

• Max size is 280X220mm
• Software supplied. Thousands of default designs supplied.
• Fast dry and color fastness

• Accept any bmp, jpeg, jpg,png,gif,tif,ps,pdf pictures freely.
• Low printing cost, easy to operate

**Most advanced RIP software:**
1. accurately control the ink volume when printer works, making sure the printed image exactly the same as the designs prepared
2. freely adjust the brightness, contrast, etc in RIP according to your request.

**Workflow:**

Step 1. Edit picture   Step 2. Put in   Step 3. Print   Step 4. Finished

**Solution:**

So easy to be Boss !

One printer + One person

Tiny **investment,** **Huge** reward

### Ink solution

**Ink:** 4 color
**Package:** 50ml, 200ml, 500ml, 1L
**Retail price:** $180 / L
**Ink consumption:** 1ml ink can print four iPhone 4 mobile phone shells

### Profit

One mobile phone shell made of ABS or PC material costs $1, its sales price will be at $20 / piece, and designed pictures at $40 ~ $50 / piece.

The profit of a single mobile case > **$17**

**One time** can maximally print **4 mobile phone shells** with **1ml ink** in just **6 ~ 8 minutes**, and printing **244 shells**, your **cost** will be **returned.**
