Overview

- . SMD LED lighting for long life-span.
- . Round shape, it's a novel style to attract people.
- . Adopting superior lighting panel, imported acrylic mirror or mineral coating glass mirror.
- . 70%-80% energy saving than the traditional light box
- . Control on/off by infrared ray sensor, when people approach, it displays a mirror, when people away, it displays a picture.
- . Configuration: Mirror board + sensor +optical light panel+ transparent back board + diffuser coat reflective coat wires, mirror is coating glass, clear.

Description:

Magic mirror light box changes between mirror and light box. Infrared ray sensor plays an important role during the whole operation because it's respondent. It's a mirror when you are approaching, and a picture when you are 47.2"-78.7" (1.2-2m) far away. It's a unique design and super slim with round shape. It is widely used in shopping mall, hotel, restaurant, house, school, etc.

Remarks:

The overall Image size needs to be larger than the viewing size, In order to have a perfect fit and a great view of the image. That goes for all A1-A4 models.
