### Overview

#### Description:

This banner welder adopts advanced welding technology and high-precision temperature controlling to ensure the machine get even temperature and good welding effect. The motor of machine is set separately with the hot air gun that is avoid the motor burnt if improper operation. Its reasonable structure is good for long life-span. This machine is widely used for welding flex banner, housetop tarpaulin, swimming pool, Membrane water bed, inflatable toys, etc.

#### Characteristics:

- . New hot air welder with motor set outside
- . Enough hot air generated from `the` motor
- . Reasonable machinery structure for long life-span
- . Adopt advanced welding technology and high-precision teperature controlling

#### Packing Details:

Packing Size: 28.3" x 21.7" x 18.1" (720 x 550 x 460mm)

G.W.: 99.2lb (45kg)
