Overview

Description:

Hi-performance fully automatic nozzle washer is one of the main products which focuses on the solution of nozzle blockage problems. It is a useful complement for our Ultrasonic Ink supplying series products. Whenever the nozzle has blockage and thread oblique, this machine can be used to solve these problems.

Product Highlights:

- IC control system keeps the whole working process running automatically.
- LCD panel indicates each step of the washing program.
- Ultrasonic and Pulse Jet flush working at the same time, to guarantee that the dirt is washed out immediately, once the ultrasonic wave has loosened it.
- Adjustable ultrasonic running cycle up to 99 times.
- Adjustable soak time up to 99 minutes.
- Adjustable flush cycle up to 99 times.
- External heating system makes your washing job safe and efficient.
- Automatic running program saves you, valuable time.

Application:

It is suitable for most popular printheads, for example: Xaar126, Xaar128, Konica and Seiko 500, etc. It can be used for daily nozzle maintenance of the printing companies, or be used as a useful tool for the professional nozzle service companies.
