

**FIRST TRULY AFFORDABLE
UNIVERSAL PRINTER
FOR YOUR BUSINESS**

Creativity without limits
Solution on a large scale of materials
Quick, affordable and ecological

GRAPO OCTOPUS II KM8/720 UV is a unique engineering digital solution just for you. This large format printing machine uses inks curable with UV lamps. Prints on rigid materials, flat materials and also on roll to roll materials whose print quality takes your graphic designing to a higher level. It offers you infinite possibilities for applications almost in photographic quality on every possible material. Our solution enables you to process any order which you could not render before with low quality printing systems. Take advantage of our quality for your benefit. The system for rigid, roll-to-roll and much more...

octopusII
KM8/720UV

Affordable UV universal printer which will provide you with a solution tailored to your individual requirements for speed, quality, picture copy, production and profit

The Octopus is designed to optimize your production process, it is easy to operate, requires easy maintenance and delivers the print speed you need for your successful business. Octopus produces flexible, roll-to-roll printing with excellent quality. The special construction of working space is designed according to ergonomic standards and could also be used for prints on very heavy and thick (up to 6 cm) materials such as glass and steel. Bearing capacity is 0,005 kg/cm². The Octopus 2 produces instant-dry prints ready to cut and apply. Creates long-lasting outdoor signage with the fastest printer in its class. It will impress customers with the speedy delivery of signs and designs that look perfect and last long. Octopus 2 is an excellent tool to boost production and profitability: increase your print volume, improve your services, and reduce your costs. We provide the best service and support in the industry: Technical training by experts / Applications assistance / Marketing tools.
