

Name: Dual-axis Metal Channel Letter Angle Bender Bending Tools, Bending Width 150mm
For bending angles of metal sheet, stainless steel, aluminum extrusions and various metal strips
Code: CS-DMCLAB-002

Overview	Specifications	Packing list	Warranty
----------	----------------	--------------	----------

Description

- This metal letters bending tool is made to solve problems of time-consuming and laborious in manual bending metal letters, and has effectively solved problems existed in bending metal sheet.
 - It can bend metal sheets quickly and accurately (It will attain the best effect if you use with CS-MBBT-001 metal slot bending machine), save time and effort, and improve production efficiency.
- Updated product, zinc plated silver color.

Features

- Two axes: One for adjustment of plywood gap, and the other for bending angles.
- Imitation of pneumatic angle bending machine, with two flexible boards, this metal letters bending tool can better adjust the plate space, bend angles for different materials;
- When bending iron stainless steel, the bending material can be guaranteed not to fall automatically by adjustment of plate space;
- This metal letter bender can fasten materials firmly, and thus can bend more perfect and accurate angles.
- It is easy to install and operate. Small size.

Tips

- This metal letter angle bender must be fixed in the usage to improve efficiency due to many operations;
- This metal letter bending tool adopts screw rod clamp type, you'd better not fix the metal too tight, otherwise will reduce the tool's service life;
- If you want to bend thicker metal or you need attain standard 90 degree angle, please make a slot at first with our CS-MBBT-001 metal slot bending machine;
- If the distance between two angles is less than 10cm, but plus the distance between the third angle is more than 10cm, you can bend the third angle first, and then bend the second angle, so that you can avoid in-operation situation.

Application:

This metal channel letter bending tool can be used for bending angles of metal sheet, stainless steel, aluminum extrusions and various metal strips.

Packing List

Wooden Box: There is total one Carton box.

Product Dimension	210mm x 140mm x 150mm (8.3" x 5.5" x 5.9")
Machine Weight	5.8kg
Package	Carton box
Packing Size	295mm x 180mm x 200mm (11.6" x 7.1" x 7.9")
Gross Weight	7.5kg

Application:

This metal channel letter bending tool can be used for bending angles of metal sheet, stainless steel, aluminum extrusions and various metal strips.
