

1: Installing iron disc (as follow, But my disc is plastic.)

2: install the blade

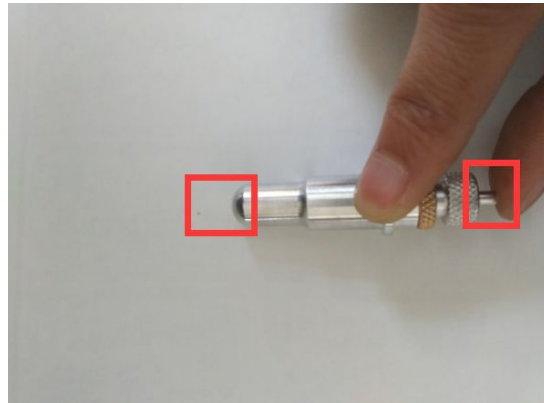

(1) open the blade and the blade holder

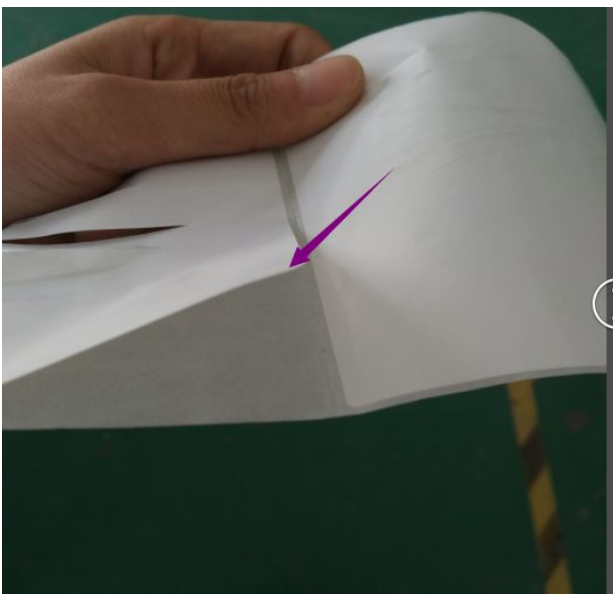

(2) Choce one blade to installed

(3)Install the blade in holder

(4)The tip depends on the length of the cutting material thickness

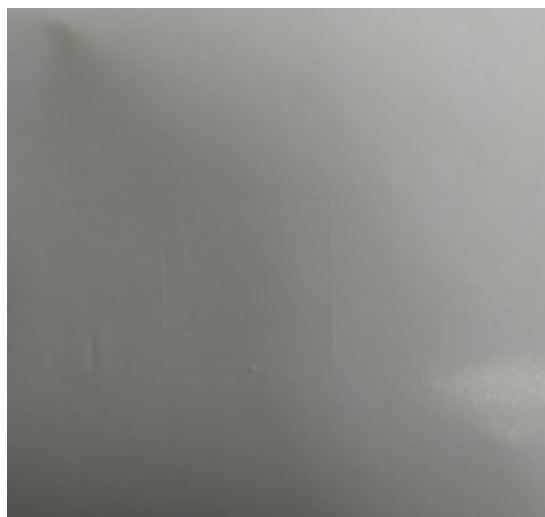

(5)How to test the tip on media.

When you use the installed just cut the first layer of paper, that point is appropriate.

(6)How to test the tip on machine.

When you put the material and knife installed, open the machine, press the test button, the machine will automatically cut a square and triangle,
Just cutting the first layer of material is the best force, if not through the button to increase force and reduce force

3:install the roller label
